Instructions on Drawing:

1. Open up Illustrator and create a new document. Choose 'print' as an option, then 'Letter' size.
2. On the left column, you will see a square shape, left click on that and choose the ellipse tool.
3. Choose that and drag to make a perfect circle.
4. After you made at the circe, color the inside of the circle a magenta (pink/purple) color.
5. Copy paste that circle three more times, so you have a total of 4 circles.
6. Draw one more circle and make it about 1/2 the size of the other circles and color it yellow.
7. Arrange the circles where the yellow circle is in the middle, and the magenta circles are all around the yellow circles, so the end looks like a flower.
8. Finally, use your rectangle tool to draw the stem of the flower and color it green. Arrange it at the base of your flower.
